IMPORTANT

The terms & conditions embodied in this permit require the permittee to complete this work by the date specified, the following rules will govern:

- (a) **FAILURE TO START WORK BY DATE SPECIFIED FOR COMPLETION:** Permit will be cancelled unless permittee desires an extension of time, in which case a supplemental permit may be issued.
- (b) **WORK STARTED & NOT COMPLETED BY SPECIFIED DATE:** Permittee will notify Township, prior to expiration of allotted time, of inability to complete the work on or before the date specified & request an extension of time. Such request shall be accompanied by the prescribed fee.
- (c) **PERMITTEE NOT DESIROUS OF CARRYING OUT PROPOSED WORK ON ACCOUNT OF CHANGE IN CONDITIONS AFFECTING IT:** Permittee will notify the Township prior to the date specified for completion that work will not be carried forward, returning the permit with such notice. The fee for the inspection of the work will be refunded by the Township, provided that they have been notified of cancellation PRIOR to the expiration date.

The fees to be paid under the conditions in (a), (b), and (c) apply only to permits for which fees are collected in accordance with the fixed fee schedule adopted by ordinance and amended from time to time by resolution.

All notices relative to time extensions or cancellations shall be forwarded to the Township which issued the original permit.

The following Conditions, Restrictions & Regulations for restoration of the highway are the responsibility of the permittee:

The openings made in the pavement or shoulder must be backfilled with compacted aggregate (PA DOT 2A) above required pipe backfill. Backfill material shall be placed in loose layers not to exceed 8 inches if vibratory compaction equipment is used or as authorized under section 601.3(f) of PA DOT Publication 408. Compaction shall be completed to the bottom elevation of the proposed pavement. The pavement thickness should be at least as thick as the existing pavement thickness or a minimum of 8" (4" 25mm base course, 2.5" 19 mm binder course, 1.5" 9.5 mm wearing course), whichever is greater.

A minimum 15' length of roadway on both ends of the excavated area should be milled to a depth of 1.5" and re-surfaced with 1.5" of bituminous wearing course. If the excavated area is confined to a single lane, then the milled area should extend to the centerline of the roadway. If the excavated area extends beyond the centerline of the roadway, then the entire width of the roadway should be milled and re-surfaced.

If four or more openings are made by the same permittee within 100 linear feet of pavement, the Township may require the permittee to restore the entire disturbed pavement between the openings by milling and re-surfacing the entire disturbed pavement. The top of every manhole, valve box or other access to the facility shall be the same elevation as the surface in which it is located.

All proposed work is subject to review and approval by the North Franklin Township Engineer prior to work taking place. Once completed, all work is subject to review and approval by the Township Engineer prior to any bonds, escrows, etc. being released.

I/we, _____, on behalf of the Permittee,

acknowledge receipt of the above listed Conditions, Restrictions and Regulations and understand and accept responsibility to adhere to the guidelines herein.
